

# How Sustainable is Your City?

## *Become More Energy-Efficient with GreenTraks*

Cities and counties use GreenTraks for its full-service energy-efficiency, sustainability, and employee-engagement initiatives, helping public and private organizations meet objectives

### **Energy Benchmarking**

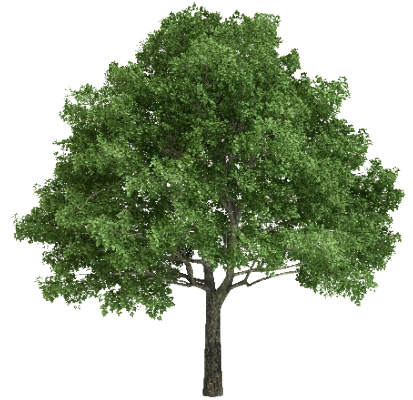

Manage your energy and resources with the cloud-based *GreenTraks Energy Manager™*, an industry-leading interactive platform that provides a simple and powerful way to benchmark facilities and reduce costs. GreenTraks also relieves your staff from manual data-entry by using automated processes.

### **GreenTraks Fleet & Project Reporting**

Create "greener fleets" by tracking and managing fuel and costs down to the transaction with Fleet Tracking. Manage successful energy-efficiency project strategies and verify your return on investment with Project Reporting.

### **Climate Action Partners Program**

GreenTraks puts the action into your Action Plan by partnering to facilitate outreach with local businesses on energy-efficiency and ENERGY STAR reporting. Just 2% of greenhouse gases are attributed to city governments so local businesses need ways to reduce.

### **Payment System Integration & Bill Auditing**

Payment system integration simplifies your utility bill payment process, saving hundreds of work-hours annually that can be redirected to better uses. GreenTraks bill auditing service helps catch billing errors and anomalies.

### **Encourage Change in Your Community**

With the Climate Action Partners Program, GreenTraks provides Sustainability Marketing services to help you promote environmental stewardship, improve your city's image and attract new businesses.

*"GreenTraks makes it simple to realize savings through energy-bill auditing and helping us determine the right energy-efficiency projects to implement. As a city we know it's important to focus on sustainability, and GreenTraks makes that easy."*

*-Darin Gale  
Economic Development Manager, City of Yuba City*
